PROTOCOL 17: SLEEP ARCHITECTURE

*   **Importance:** Sleep is crucial for physical and mental restoration. Disrupted sleep can exacerbate withdrawal symptoms and hinder recovery.

*   **Alcohol-Specific Considerations:**

    *   Avoid all alcohol, including cooking alcohol and mouthwash containing alcohol. Even trace amounts can activate the reward circuit and disrupt sleep architecture in early recovery.
    *   Vivid dreams during early recovery are often REM rebound – a normal healing process, not symptoms to be suppressed.

*   **Sleep Hygiene:**

    *   Maintain a regular sleep schedule: Go to bed and wake up at the same time each day, even on weekends.
    *   Create a relaxing bedtime routine: This could include taking a warm bath, reading a book, or listening to calming music.
    *   Optimize your sleep environment: Ensure your bedroom is dark, quiet, and cool.
    *   Avoid caffeine and nicotine before bed.
    *   Limit screen time (phones, tablets, computers) in the hour before bedtime.

*   **Addressing Sleep Disturbances:**

    *   If you experience persistent insomnia or other sleep disturbances, consult with a healthcare professional. Medical help is not failure.
    *   Do not run this module without consulting a doctor.
    *   Consider relaxation techniques such as deep breathing exercises or meditation.
    *   Ensure adequate hydration throughout the day, but avoid drinking large amounts of fluids before bed.

*   **Medications:**

    *   Certain medications can interfere with sleep. Discuss any medications you are taking with your doctor.
    *   Do not self-medicate with over-the-counter or prescription sleep aids without consulting a healthcare professional.
